### Objective:

-----

Senior Full Stack Developer with 10 years of experience in designing and developing high-quality applications. Proven expertise in leading development teams, architecting complex solutions, and optimizing app performance. Seeking to contribute my skills and experience to a forward-thinking company.

### Professional Summary:

-----

- 10 years of experience in **Android** app development, with a strong understanding of mobile architecture, UI/UX design principles, and best practices.
- Proficient in Java programming languages, as well as Android Studio, Gradle, Proguard, and popular development libraries.
- Solid experience with RESTful APIs, database management, and cloud integration (Firebase, AWS, etc.).
- Strong knowledge of Material Design guidelines and a passion for creating polished, user-friendly interfaces.
- Proven ability to lead and mentor development teams, ensuring code quality and timely project delivery.
- Track record of optimizing app performance, including memory management and load times.
- 5 years of experience in **Angular** app development, with a good understanding of web architecture, typescript, Modules, Components, and with more focus on application logic (typescript).
- 3 years of experience in **Backend** app development, with a good understanding of (**monolithic, microservice, clean**, etc) architecture, service discovery, rpc, socket, stateless, and most helpful **design patterns**.
- about 2 years of experience in **iOS** app development, with a strong understanding of mobile architecture, UI/UX design principles (storyboard), and best practices.
- Proficient in Objective-C and Swift programming languages, as well as XCode, and popular development libraries, like android development any useful librarie's and database's and etc.

### Professional Experience:

-----

Full Stack Developer | SamaSoft | Tehran, Iran | 2014 - Present

- Led a team of 3 developers in the design and development of 3 Android applications, resulting in Student, Professor, Education.
- Led a team of 5 developers in the design and development of many backend projects, resulting in Education, Dormitory, Welfare, Evaluation, Database Insurance, etc.
- Led a team of 3 developers in the design and development of 3 Angular projects, resulting in Student, Professor, Education, Dormitory, Welfare.

- Collaborated with cross-functional teams, including product managers and designers, to deliver high-quality apps on time and within budget.
- Designed and implemented complex features, optimized code for performance, and resolved critical bugs.
- Developed and maintained RESTful APIs for app functionality, ensuring secure and reliable data exchange.
- Actively participated in code reviews to maintain code quality and identify areas for improvement.
- Conducted knowledge sharing sessions, training junior developers, and promoting best practices within the team.

#### Full Stack Developer | KhoshPoshanRadin| Tehran, Iran | 2018 - 2021

- Worked on 1 Android projects, contributing to the design, development, and maintenance of mobile applications for a marketing and C2C trades.
- Collaborated with the UI/UX team to create visually appealing and user-friendly interfaces in compliance with Material Design guidelines.
- Implemented both backend and frontend projects to connect customers to each other and trade their goods to each other.
- Utilized third-party libraries and open-source tools to streamline development and enhance app functionality.

#### Android Developer and Consultant | AminHolding | Tehran, Iran | 2015 - 2018

- Worked on 1 Android projects, contributing to the design, development, and maintenance of mobile applications.
- Collaborated with the UI/UX team to create visually appealing and user-friendly interfaces in compliance with Material Design guidelines.
- Implemented Firebase and other cloud services for app analytics, crash reporting, chart, and user authentication.
- Utilized third-party libraries and open-source tools to streamline development and enhance app functionality.

#### Education:

-----

Bachelor's Degree in Information Technology (IT)  
SufiRazi | Zanjan | 2013

#### Skills:

-----

- Programming Languages: **Java, NodeJs, Typescript**, Swift
- **Android Studio, Gradle, XCode, CocoaPod, npm**, maven
- UI/UX Design
- RESTful APIs
- **Socket and WebSocket**
- **Firebase**
- **Sentry**
- Service Discovery (**Eureka**, Consul)
- RPC (**gRPC**)
- Kubernetes and Docker

- Gateway (Zuul, SpringCloud)
- Database (**Postgres**, **SQLite**, **MSSQL**, **MariaDB**, MongoDB, ELK, **Redis**)
- Database Management (**Realm**, **Room**, **Sequelize**, Hibernate, TypeORM, Prisma)
- Agile/Scrum Development
- **Git** and **Mercurial** Version Control
- **Problem Solving and Debugging**

Open-Source Projects:

-----

I assisted an aging community known as "Multi-OS-Engine," which aimed to enable iOS app development using Java code originally designed for Android applications. It was a remarkable endeavor, as I collaborated with a substantial community to support this project pro bono. Unfortunately, the product eventually became obsolete due to the emergence of competing technologies like React Native and Xamarin. However, that was a good experience for me, and proud of myself to a part of that.
